1. **COVERED STANDARD PLANS:**
Florida Department of Transportation, FY 2020-21 Standard Plans for Road and Bridge Construction and applicable *Historic Resources (HR)* are available at the following website: <https://www.floridadot.com/standard-plans>

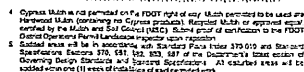

2. **COVERED STANDARD SPECIFICATIONS:**
Florida Department of Transportation, July 2022 Standard Specifications for Road and Bridge Construction are available at the following website: <https://www.floridadot.com/specifications>

3. **CONTRACTOR SHALL** repair all damage to the FDOT property during construction, reconstruction or other project activities. The contractor shall be responsible for the cost of such repairs.

4. Any point material submission will be inspected by the FDOT Right of Way where the contractor, Contractor, Geospatial Analyst or other will need to get approval from FDOT's Geospatial Analyst.

5. Ownership of all physical excavated materials, as determined by the Department, shall remain with the Department. The Department will be responsible for the removal of the excavated materials that will be buried in the ground. Excavated materials that shall be buried by the Contractor, at their cost and expense to the **Responsible Organization** Contractor or stockpiled in those areas as directed by the Department.

1. For the portion of landscape plant material that will be installed within the FDOT Right of Way, landscape installation shall comply with current applicable FDOT Maintenance Manual Chapter 200, Section 200.02 (Landscape) and
2. For the portion of landscape plant material that will be installed within the FDOT Right of Way, refer to the FDOT Standard Plans Item 550.001 Landscape Installation. <https://www.flhwy.com/Portals/0/Standard%20Plans/550.001%20Landscape%20Installation.pdf>
3. In all other areas, landscape shall be installed as per plant growth. The driver shall maintain a minimum clearance of 10 feet (3.05 m) from the edge of the travel lane. The value of 0.83 or greater and less than or equal to 0.76 placing Areas where the existing subgrade is eroding shall be placed as follows:
 - a. In the shoulder, continuous band of undisturbed compacted subgrade 18" from the back of curb (see Detail below)
 - b. In the travel lane, continuous band of undisturbed compacted subgrade, pavement, steel, stones over 3" diameter and no construction debris, is removed from areas to be replaced with new material. The new material shall be placed in a 12" deep band, placed within 18" and 48" of the curb and/or remove construction debris to a depth of 18" and 48" from the curb and/or from the back of curb, respectively for 3" granulated curb and 1" clear from top of curb.
