

JACQUELINE RAILEY  
MAYOR

March 5, 2026

The Honorable Jared Moskowitz  
U.S. House of Representatives  
242 Cannon House Office Building  
Washington, DC 20515

Dear Congressman Moskowitz,

As Mayor of the City of Coconut Creek, I am pleased to support the City's Fiscal Year 2027 Community Project Funding request for the **Emergency Operations Center (EOC) HVAC and Technology System Project**.

Our Emergency Operations Center is where our team coordinates response efforts during hurricanes, severe weather, and other major incidents. It is also home to key public safety and public works functions that operate every day to support our community, as well as a Broward County's consolidated Public Safety Answering Point (PSAP). Ensuring that this facility remains reliable and fully operational is essential to protecting our residents, the County's residents, and maintaining continuity of operations during emergencies.

The current HVAC system supporting the facility has reached the end of its useful life. Replacing this system will help ensure that critical communications equipment remains protected and that first responders and emergency personnel have a safe and functional environment during extended emergency activations.

This investment aligns with Coconut Creek's Vision 2030 Strategic Plan, which prioritizes safety, quality of life, and the delivery of reliable municipal services. The City has committed local resources toward maintaining this facility, and federal support will help us move forward with this important infrastructure upgrade.

Thank you for your continued support of Coconut Creek and for your consideration of this request.

Sincerely,

JACQUELINE RAILEY  
Mayor

March 2nd, 2026

26-009

The Hon. Jared Moskowitz  
U.S. House of Representatives  
1130 Longworth House Office Building  
Washington DC 20515-0923

Dear Congressman Moskowitz,

On behalf of Broward County, I am pleased to provide this letter of support for the City of Coconut Creek's proposed project to upgrade critical emergency operations software systems and modernize the heating, ventilation, and air-conditioning (HVAC) infrastructure serving the Coconut Creek Emergency Operations Center (EOC), the City's Public Works facilities, and Broward County dispatch operations supporting the City.

As the Broward County Local Mitigation Strategy Working Group Chair, I work closely with municipal partners to strengthen emergency preparedness, response, and continuity of operations throughout the County. The facilities included in this project play a vital role in coordinating public safety, emergency response, infrastructure restoration, and interagency communications before, during, and after disaster events.

The proposed software upgrades will significantly enhance operational coordination, situational awareness, and information sharing among City departments and regional partners. These improvements will strengthen decision-making and communication capabilities during emergency activations and support more efficient and effective response operations.

Equally important, the proposed HVAC upgrades will improve the reliability and resiliency of these critical facilities. Modern, dependable climate control systems are essential to maintaining continuous operations, protecting sensitive technology and communications equipment, and ensuring safe and functional working conditions for emergency personnel during extended disaster response and recovery efforts.

This project is fully aligned with Broward County's emergency management and Local Mitigation Strategy goals by strengthening critical facilities, improving system reliability, and enhancing the City of Coconut Creek's ability to maintain essential services during and following hazard events.

Broward County strongly supports the City of Coconut Creek's efforts to invest in resilient infrastructure and modern emergency management systems, and we believe this project will provide long-term benefits to both the city and the region.

Thank you for the opportunity to provide this letter of support. Please do not hesitate to contact me at [CRHALL@broward.org](mailto:CRHALL@broward.org) or at 954-831-3933 if additional information is needed.

Sincerely,

A handwritten signature in blue ink, appearing to read "Craig Hall".

Craig Hall  
Assistant Director  
Chair, Broward County Local Mitigation Strategy Working Group
