GameTime Executive Summary

Our Mission

The GameTime mission is to be the global leader in the commercial park and playground market using its rotational molding capabilities, design engineering and manufacturing, new product innovation, dedicated employees, and outstanding "customer focused service". At GameTime, we understand our most important customers are children. We take our commitment to develop imaginative, safer and more accessible playgrounds seriously. We recognize the best play experience combines innovative and compliant equipment that engages children in physically and mentally stimulating activities. Products are developed to educate, challenge, stimulate and entertain the mind while providing opportunities for very active through somewhat passive physical play.

Industry Leadership

As the market leader in school and park playground equipment sales with 18.5% share, GameTime is differentiated by its unique and innovative products, price competitiveness, manufacturing quality and network of professional field representatives. Superior rotomold capabilities, an experienced and stable workforce, increasing manufacturing efficiencies and throughput, continuing process redesign, effective quality control, state-of-the-art facility and equipment, coupled with the fastest shipping cycle in the industry, result in lower prices and on-time deliveries of premium products.

GameTime is honored to have many repeat customers and has established longstanding supply relationships with the New York Housing Authority, New York Department of Parks, Chicago Public Building Commission, San Diego Unified School District, Baltimore County Recreation and Parks, Toronto District School Board, ARAMCO (Saudi Arabia), and others. GameTime is a vendor to the Federal Government under General Services Administration (GSA) contract GS-07F-0397K.

Innovation

With over 300 composite structure components, product innovation is a key GameTime strength. For example, our *BigFoot Slide* offers three different sliding experiences; our one-piece eight-foot high super-wide *RockSlide* spiral slide with natural rock-like texture on the slide and hood; our *Accessible Dragon* combines fantasy with accessibility; our *MegaRock Climber* provides realistic rock climbing and an underside cave experience complete with wall fossil. See our 2008 Park and Playground Catalog for many more examples.

With our PowerScape® PowerLock™ connection systems, the only factory installed "clamp" in the industry, customers are assured of proper and "compliant" equipment installation at reduced

time and expense. No onsite measuring and drilling of uprights, and no guesswork where components attach. Our systems come easy to follow instructions and diagrams; we leave no margin for error like clamp-based systems do. GameTime introduced the Entry Archway to reduce inadvertent falls while allowing access to the structure; now an ASTM industry requirement. GameTime decks bolt directly into the supporting upright using our exclusive vandal-resistant deck connection.

Manufacturing

GameTime is a vertically integrated company with extensive design, manufacturing and distribution capabilities. With 400,000 sq. ft. under roof on an 81-acre facility devoted solely to the manufacture of playground equipment, GameTime is well equipped to handle orders of any size. The company currently employs more than 445 employees in management, engineering and manufacturing roles. Seasonal weekly production can exceed \$2,750,000. The daily inventory of raw materials often is valued at approximately \$9,000,000. We do all metal fabrication, rotationally-molded plastic and powder coating "in-house". Once an order is entered and accepted, GameTime is in a position to deliver equipment to its customers within 30 to 45 days. Typically, GameTime operates on a 21-day production cycle, based on weekly manufacturing releases.

Product Specifications

Customers may choose between aluminum and galvanized steel supporting posts (uprights). Primary connecting hardware is of 304 stainless steel with button pin-in-head, torque-socket cap screws with a two-part epoxy locking patch added to the threads to reduce loosening resulting from vibration and use. Metal assemblies are MIG (metal inert gas) welded for maximum penetration and good structural integrity. See our full product specifications.

Paint finishes are applied electrostatically to a 3.0 – 5.0 mil thickness with a custom formula of TGIC polyester powder that is oven cured at 400 degrees for superior adhesion characteristics and maximum exterior durability and longevity. Prior to coating, all components are mechanically cleaned and washed in a six-stage bath system with an iron phosphate wash, a rust inhibitor, and sealer to prevent flash rusting before coating. Coatings are tested for hardness, adhesion and impact resistance in accordance with ASTM standards.

Rotationally-molded plastic products are produced of linear low-density polyethylene with UV-stabilized color and anti-static compound additives. GameTime has pioneered the manufacture of large, single-piece plastic parts. GameTime routinely inspects and tests its products at random for compliance with manufacturing tolerances and quality standards per ISO procedures.

Quality Assurance

As an ISO 9001/2000 certified (unconditionally) company, GameTime maintains a program of quality assurance and standardization in design control, development, production, installation and servicing in accordance with procedures by the International Organization for Standardization. GameTime's Quality Assurance Department inspects parts at random for compliance with manufacturing specifications and tolerances in accordance with ISO 9001/2000 procedures. Manufacturing

processes are carefully defined, documented and monitored to make possible the production of uniform, quality parts. Quality audits are performed daily to reduce manufacturing error. Special welding fixtures are used for each part to facilitate proper assembly and fitting. GameTime is ISO 9001/2000 certified, the most up-to-date certification possible.

PAYMENT METHODS

VISA PURCHASING CARD (reference informational flyer on following page):

The City of Coconut Creek has implemented a Visa Procurement Card (P-Card) Program through SunTrust Bank. The City's preference is to pay for goods/services with the P-Card. This program allows the City to expedite payment to our vendors. Some of the benefits of the P-Card Program to the vendor are: payment received within 72 hours of receipt and acceptance of goods, reduced paperwork, issue receipts instead of generating invoices, resulting in fewer invoice problems, and deal directly with the cardholder (in most cases).

Vendors accepting payment by the P-Card may not require the City (Cardholder) to pay a separate or additional convenience fee, surcharge or any part of any contemporaneous finance charge in connection with a transaction. Such charges are allowable, however must be included in the total cost of the bid. Vendors are not to add notations such as "+3% service fee" in their bid response. All bid responses shall be inclusive of any and all fees associated with the acceptance of the P-Card.

Vendors agreeing to accept payment by P-Card must presently have the capability to accept Visa or take whatever steps necessary to implement the ability before the start of the agreement term.
