**Subject: Vacation Easement Justification – South 10' Utility Easement
Lyons Exchange Center
Coconut Creek, FL
City Project No. 18080001
CWI Project # 8281**

Dear Ms. Aguiar,

We respectfully request approval to vacate the existing 10' Utility Easement located along the South Property line of the proposed Lyons Exchange Center project.

The abandonment of this existing utility easement should be approved based on the following:

- 1). The Owner has contacted Utility locates, and their site visit showed no existing utilities within this easement.
- 2). We have reviewed As-built information on existing water and sewer lines, and there are no water or sewer mains running parallel within the existing easement.
- 3). There are four existing water and sewer stubs from the Sawgrass Exchange project which cross the existing easement. Three of these stubs are being connected to by the Lyons Exchange Center project for looping of the water system; and sewer connection to an existing manhole.

The water and sewer connections within the Lyons Exchange Center project have been located within paved areas; and easements are being provided to allowed ease of operation and maintenance of the lines by the City. There are existing easements over the lines within the Sawgrass Exchange project, which allow access to the lines by the City.

- 4). Letters of no objection received for the easement abandonment, are attached.

We appreciate your cooperation, and approval of this request.

Sincerely,
Caulfield & Wheeler, Inc.

Re: Lyons Exchange Center

Per your request, FPL has no objection to the proposed easement abandonment for Lyons Exchange Center with these stipulations.

It appears FPL does have several locations with existing overhead and underground facilities that serve or are adjacent to the existing site.

Should any FPL facilities need to be removed or relocated, then the applicant will pay for the total costs of any relocation or replacement of those FPL facilities as deemed necessary by FPL or requested by the applicant. Additionally the applicant will pay for any costs associated with any relocation of FPL facilities due to requests to relocate any overhead facilities to underground, new turn lanes, de-acceleration lanes, road right-of-way vacations etc.

FPL will require a complete set of plans prior to construction. These would include site, civil, landscape, and electrical. As the FPL engineering, design, and construction process encompasses about a six to eight month schedule it is imperative that complete plans be provided well in advance of construction.

For the new construction project planned for this site the customer will need to provide any additional easement requirements needed by FPL. These easements will be provided by instrument and will be provided prior to construction or installation of FPL facilities.

If I can be of assistance feel free to contact me at 954-956-2022 my fax is 954-956-2020.

Sincerely,

A handwritten signature in black ink, appearing to read "Nicholas Panzo", written over a horizontal line.

RE: Letter of no objection for abandonment of Easement at 6401 Lyons Road

Andrew,

AT&T has no objection to the ABANDONMENT OF THE Utility Easement as shown on the attached plan. Currently AT&T has NO buried facilities in the Utility Easement in question. Please contact 811 prior to the start of this project to ensure our facilities are located properly.

If you require additional information please contact me at 954-476-3141.

Sincerely,

Doug Newlin
