Program Philosophy and Proposed Show Segments

Generally speaking, there is an opening segment, main body and grand finale of a fireworks display. Just as a great play or movie has various segments that flow together, firework shows are similar type productions that should never leave the audience wanting more or leaving disappointed.

There are fundamental basics that Zambelli Fireworks adheres to, with which we create the best displays in the industry. Some of these fundamentals include:

- **No Dead Air** Just as any TV, radio or Big Screen Production, "Dead-Air" is simply not acceptable. At any given time there will be multiple firings of shots and shells in the air for the display.
- **Shell Size Combinations** A common way for companies to set a show is to shoot all 2 inch shells, then all 3 inch shells, then all 4 inch shells, etc. While this makes it easy for a technician, it is simply boring. Zambelli technicians are trained to set shows to create the ultimate in shell combinations for the various firing sites. For example, firing two 3 inch Gold Kamuro Willow shell (400 ft.) and six 2.5 inch Purple Dahlias is a great, beautiful combination. Firing two 3 inch Pink strobing lights and six 2.5 inch white strobing lights within seconds offers up to 8 seconds of beautiful strobes covering 200 to 400 ft in the air.
- **Rhythm and Intensity** Just as many movies have a loud, action-packed car chase one moment followed by a romantic scene the next moment, fireworks productions also need to flow. A show that is too fast or too slow can get monotonous. Zambelli designs shows that one moment are a constant barrage of colors and booms while the next moment may be soft horsetail golden willows fluttering down from the sky one-by-one.
- **Finales** There's a major art to shooting a spectacular finale. Many people think a finale is simply shooting a lot of shells. While true from a quantitative standpoint, a finale must make sense in order to entertain most effectively. Zambelli designs finales that start slower and lower. For example, 3 inch peony finale shells fired every half-second for 20 seconds may then grow in intensity to include white or silver glittering for the next 20 seconds. Then larger 4 inch blue cracking spiders take over while 3 inch white coconut trees are laying the ground cover. Finally the 100 3 inch multi-color crossettes are covering the sky while the 3 inch titanium salutes are rumbling the skies for miles.

Zambelli

FIREWORKS

OPENING: An opening barrage is designed to attract the attention of the audience and entice them to pay attention..."The show has just begun!" The opening barrage for your event will certainly impress as a barrage of assorted colors, effects, and noise shells fill the night's air.

FEATURE PRESENTATION: The main body of the fireworks display should not be just one shell fired one after another. It's about rhythm, timing, and choosing the perfect effects to complement one another to build themes. Some fireworks shells are designed to be extremely intense while others are designed to slow the pace down with beautiful, softer effects. The design team hand picks every display shell used to ensure a wonderful variety of effects. The audience will never see the same combinations of shells fired in a Zambelli production.

BARRAGES OF MULTI-SHOT DEVICES: Multi-shot devices or barrage cakes are used to add to the dynamics of the show. Zambelli Fireworks uses only the highest quality Barrages with innovative effects, colors, and angles. These devices incorporate effect sizes from 1" to 2".

GRAND FINALE: and it will be GRAND!

Human nature is to remember things last experienced. The Grand Finale is what people will remember the most about a fireworks production. A poor finale will leave an audience disappointed. Zambelli Fireworks has a long tradition of supplying the best and biggest finales in the industry. It will be loud, it will be full of vibrant colors, it will be long, and it will leave a lasting impression. Hundreds of shots and effects of multi-color shells, gold and silver sparking lights, gold brocade crown shells and other effects coupled with chest-pounding titanium-salutes will be the magical ending of the grand display. The finale will be fired from multiple positions with dynamic angles. The incorporated shells, with multiple different sizes and effects, will cover every inch of sky from 150 to 300 ft in the air.

FIREWORKS

Products:

Zambelli Fireworks carries an inventory of display shells that is more than 2,000 unique shapes, colors, patterns or varieties from nearly a dozen manufacturers. During the 2022 July 4th display season Zambelli fired more than 1,200 different types of unique shells during the opener, body and finale of shows. It would be next to impossible to discuss every single shell in detail and provide information on each one.

Zambelli chooses fireworks from a number of different manufacturers from around the world to provide audiences with both unique and creative products. Sunny, PyroEast, Vulcan, Dominator and Dancing products all come from premium Chinese manufacturers. Cabeller shells are very premium Spanish shells. Panzera from Italy make the best multi-shot shells and roman candles in the industry. Hosoya Japanese shells provide some of the best willow and kamuro shells in the world. Lastly, Zambelli still manufactures shells, some of which will be seen during the display.
