Albert "Butch" Arenal, Police Chief
Osama Elshami, Utilities and Engineering Director
Eve Lewis, Assistant City Attorney
Sheila Rose, Assistant City Manager/Sustainable Development Director
Brian Rosen, Public Works Senior Project Manager
Alex Tergis, Public Works Assistant Director

LYONS ROAD COMPLETE STREETS PROJECT UPDATE

Assistant City Manager / Sustainable Development Director Sheila Rose introduced staff from the Florida Department of Transportation (FDOT), including Project Manager Brad Salisbury and Road Wall Designer Marvin Joseph. She stated that the City had been awarded a grant from the Metropolitan Planning Organization (MPO) for a Complete Streets mobility project along Lyons Road, which would be implemented as a design and construction project administered by FDOT. She explained that the project was in the design phase and that FDOT was seeking the City's consensus of the typical section package in order to proceed with the 30 percent design plans.

Ms. Rose began a *PowerPoint* presentation and explained that the mobility project would provide design standards for cars, bicyclists, and pedestrians. She discussed the seven segments of the project beginning at Fern Forest and heading north to the county line. Ms. Rose noted that the roadway lane width was proposed to be 11 feet and discussed sidewalk connections in segments 4 and 5. Discussion ensued regarding bike by-pass paths through Winston Park. Ms. Rose mentioned that Broward County would be resurfacing and restriping segment 7 from the Sawgrass Expressway to the northern City limits and noted that Mark Horowitz from Broward County was present.

Discussion ensued regarding the specifications for colored bike lanes. Ms. Rose discussed the funding commitments for the project and proposed City-funded add-ons, including lighting and decorative crosswalks. She reviewed several lighting fixtures and crosswalk options and the proposed project schedule.

Mr. Salisbury explained the bike lane design, including buffers and construction materials. Discussion ensued regarding roadway stacking, clearance for emergency vehicles, solar lighting, design elements for the southern segments of the project, and the addition of pedestrian lighting. Mr. Salisbury responded to a question from the Commission regarding innovation and commented that there was discussion regarding using audible warnings for vehicles approaching bike lanes. Ms. Rose responded to a question regarding phasing and noted that maintenance and traffic plans would be developed for the construction portion of the project and that the contractor would provide advanced notice to residents through signage and public outreach. Mr. Horowitz commented that the County would complete their portion at the end of the project.

Consensus was given for the proposed typical sections, bollard lighting, and decorative crosswalks. It was noted that FDOT and City staff would proceed with 30 percent design plans based on consensus given.

ADJOURNMENT

The meeting was adjourned at 6:51 p.m.
